06/2018 - 07/2018
Achievements/Tasks

- Worked on Full-Stack Development and designed a Bug Tracker system.
- Tech Stack: JAVA, JSP, MySQL, HTML, CSS, and Android Studio.

SKILLS

`JAVA` `C#` `MySQL` `HTML` `CSS` `JavaScript` `PHP` `Bubble`

PROJECTS

BUG TRACKER SYSTEM (06/2018 - 07/2018)
- The fundamental idea is to create a web application using JAVA, JSP, and MySQL, that allows customers to contribute feedback and complaints about various items to a single platform, where they are resolved by experts. This concept aims to improve bug tracking and provide consumers with more challenges.
- GIT Repo: https://github.com/hardiksaini10/Bug-Tracker-System.git

The Investor (07/2022 - 08/2022)
- The goal is to develop a web-based tool using HTML, CSS, and JavaScript for crowdsourcing funding for a project or company.
- GIT Repo: https://github.com/hardiksaini10/The-Investor.git

E-Portfolio
- An electronic portfolio is a collection of electronic evidence assembled and managed by a user, usually on the Web, and created using HTML, CSS, and JavaScript. Such electronic evidence may include input text, electronic files, images, multimedia, blog entries, and hyperlinks.
- GIT Repo: https://github.com/hardiksaini10/portfoilo.git
- Visit : https://hardiksaini10.github.io/portfoilo/

Library Management System (06/2019 - 07/2019)
- The basic concept is to design a user interface using Python and MySQL that enables the librarian to manage all editing, updating, and managing books by entering information about books and customers. This seeks to enhance library management and offer easily accessible book and user data storage.
